

# **Lessard-Sams Outdoor Heritage Council**

## **Laws of Minnesota 2012 Final Report**

**Date:** November 08, 2017

**Program or Project Title:** Minnesota Moose Habitat Collaborative

**Funds Recommended:** \$960,000

**Manager's Name:** Jenny Foley

**Organization:** Minnesota Deer Hunters Association

**Address:** 460 Peterson Road

**City:** Grand Rapids, 55744

**Office Number:** 218-327-1103

**Email:** kimn@mndeerhunters.com

**Legislative Citation:** ML 2012, Ch. 264, Art. 1, Sec. 2, Subd. 3(e)

**Appropriation Language:** \$960,000 in the second year is to the commissioner of natural resources for an agreement with the Minnesota Deer Hunters Association to restore and enhance public forest lands in northeastern Minnesota for moose habitat purposes. A list of proposed restorations and enhancements must be provided as part of the required accomplishment plan.

**County Locations:** Cook, Lake, and St. Louis.

**Regions in which work was completed:**

- Northern Forest

**Activity types:**

- Enhance

**Priority resources addressed by activity:**

- Forest

### **Summary of Accomplishments:**

The Minnesota Moose Collaborative (Collaborative) has implemented a variety of habitat enhancement treatments across the core of moose range in Northeast Minnesota on County, State, Federal, and Tribal lands since 2013. Moose browse has been improved through treatments that regenerate preferred brush and tree species. The Collaborative has also planted over two million trees including white spruce, white pine, jack pine, and white cedar.

### **Process & Methods:**

Improving moose browse calls for treatments that regenerate preferred brush and tree species. In some places, this happens naturally. The area burned by the 2011 Pagami Creek fire is an example of this and is providing some excellent moose browse according to biologists. Most logging on uplands results in some regeneration of moose browse. However, there are tens of thousands of acres in moose range that will not see a natural browse regenerating event like fire or do not have enough volume of merchantable wood to make an economical timber sale. In these areas, the Collaborative used bulldozers, brush saw crews, and prescribed fires to shear, cut, and burn the old decadent brush and stimulate re-growth that is more palatable, nutritious, and easy to reach for moose.

Cover for hiding from predators and protection from the elements is another part of the habitat equation. Research has shown that moose prefer forests with mixed conifer and deciduous trees. The pre-settlement forest in Northeast Minnesota was 70% conifers and 30% deciduous trees. Today that ratio is completely reversed with 70% deciduous and only 30% conifers. Improving cover habitat for moose means restoring conifers on the landscape. The Collaborative has planted over two million trees including white spruce, white pine, jack pine, and white cedar. The pine and cedar must be protected from browsing by deer and hare using budcaps or tree

shelters. By the third year after planting, the seedlings need to be released from competition from surrounding trees and brush. This "release" is completed with brush saws which both helps the trees get established and produces another flush of future moose browse.

A look at plat books for counties in Northeast Minnesota emphasizes the need for inter-agency partnerships to produce habitat results at a meaningful scale. The ownership pattern looks like a patchwork quilt of County, Federal, and State lands (private as well, but funds for this project are limited to public lands). There was not an acre that was worked on without some level of collaboration and cooperation between partner staff. The first cut at site selection was made by looking at forest inventory data and local knowledge of potential project areas. With time and experience, Collaborative partners have refined the search for good moose habitat projects and added and dropped stands as field visits were conducted. Proposals for specific work plans at each site were shared with wildlife biologists for their approval as beneficial to moose. Partners decided who would manage the bidding and contracting, order necessary supplies, supervise the work, complete the documentation needed for invoicing, track the specifics of what was done at each site, and summarize accomplishments for grant reporting and other communication about the project as a whole. As the grant recipient, MDHA is ultimately responsible for the finances and reporting to the Lessard-Sams Outdoor Heritage Council. But, the work it takes to produce results involves many of the partnering agencies.

The variety of combinations of roles and responsibilities between staff from MDHA, the Superior National Forest, Lake County Forestry, DNR, The Nature Conservancy, and the 1854 Treaty Authority that played out in completing the work was impressive. For example, Lake County Forestry may identify a potential project on lands they manage, a Forest Service biologist may review and approve it as a good moose project, the 1854 Treaty Authority might collect pre-treatment data that is being used to track effectiveness, The Nature Conservancy may order the trees and line up the planting crew, Lake County supervises the work, The Nature Conservancy again handles the documentation and site-specific data and finally MDHA pays the contractor's invoice and then requests reimbursement in the form of State managed grant funds.

Early sampling and aerial surveys conducted by the 1854 Treaty Authority, U of M's Natural Resources Research Institute, and other agency and tribal biologists are showing that moose are preferentially using the sites that were treated.

## Explain Partners, Supporters, & Opposition:

The Moose Habitat Collaborative is made up of the following partners: Minnesota Deer Hunters Association, Superior National Forest, The Nature Conservancy, Minnesota Department of Natural Resources, 1854 Treaty Authority, Fond du Lac Band, Grand Portage Band, Cook County, Lake County, St. Louis County, and University of Minnesota Duluth, Natural Resources Research Institute.

## Additional Comments:

### *Exceptional challenges, expectations, failures, opportunities, or unique aspects of program*

Three large prescribed burns were planned in Phase I for a total of 2,924 acres that were unable to be implemented due to many factors including weather, crew availability, and the NEPA process. Other treatments were substituted to benefit moose but acres treated were less.

The high level of collaboration across the varied ownership of County, State, Federal, and Tribal lands allowed us to implement a variety of habitat enhancements across the core of moose range.

Many parcels treated were very remote. One project along the St. Louis River required CCM crews to access via canoes. About 150 acres had burned back in the late 80's, creating excellent moose browse by the early 90's, but was now becoming overgrown. The crews brought in brush saws and hand cut selected areas of the previous burn, planting back some of that area to white pine and white spruce.

## Other Funds Received:

- Not Listed

## How were the funds used to advanced the program:

Not Listed

## What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

This is a multi-phase project that will continue to use OHF funds to help continue project goals. After that time the work will continue by managing agencies. The funds help make it possible to prioritize moose habitat goals.

## Outcomes:

*The original accomplishment plan stated the program would*

**Programs in the northern forest region:**

- Increase in quality, diversity and quantity of browse available for moose using primarily shearing and prescribed fire. Increase stand complexity and maintain thermal cover components using a variety of silvicultural techniques. Increased public awareness of the need for quality moose habitat across NE Minnesota. Increased use of managed areas by moose and Species of Greatest Conservation Need.

**How will the outcomes be measured and evaluated?**

As part of the collaborative effort, UMD - NRRI completed a study of moose use within the project area and verified that moose browsing and/or moose pellets were found on over 90% of the habitat management units, and over 80% of the management units had evidence of use in 2016. Documented use by moose indicates that habitat management very likely benefited the moose population in Minnesota.

# Budget Spreadsheet

*Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan*

Total Amount: \$960,000

## Budget and Cash Leverage

Budget Name	Request	Spent	Cash Leverage (anticipated)	Cash Leverage (received)	Leverage Source	Total (original)	Total (final)
Personnel	\$105,400	\$30,400	\$0	\$0		\$105,400	\$30,400
Contracts	\$842,800	\$610,500	\$332,300	\$77,200	USFS	\$1,175,100	\$687,700
Fee Acquisition w/ PILT	\$0	\$0	\$0	\$0		\$0	\$0
Fee Acquisition w/o PILT	\$0	\$0	\$0	\$0		\$0	\$0
Easement Acquisition	\$0	\$0	\$0	\$0		\$0	\$0
Easement Stewardship	\$0	\$0	\$0	\$0		\$0	\$0
Travel	\$10,300	\$1,200	\$8,700	\$0	FDL & MDHA	\$19,000	\$1,200
Professional Services	\$1,500	\$700	\$1,600	\$0	MDHA	\$3,100	\$700
Direct Support Services	\$0	\$0	\$120,000	\$0	MDHA	\$120,000	\$0
DNR Land Acquisition Costs	\$0	\$0	\$0	\$0		\$0	\$0
Capital Equipment	\$0	\$0	\$0	\$0		\$0	\$0
Other Equipment/Tools	\$0	\$0	\$0	\$0		\$0	\$0
Supplies/Materials	\$0	\$271,300	\$0	\$0		\$0	\$271,300
DNR IDP	\$0	\$0	\$0	\$0		\$0	\$0
<b>Total</b>	<b>\$960,000</b>	<b>\$914,100</b>	<b>\$462,600</b>	<b>\$77,200</b>		<b>\$1,422,600</b>	<b>\$991,300</b>

## Personnel

Position	FTE	Over # of years	Spent	Cash Leverage	Leverage Source	Total
Grant Manager - Fiscal Agent	0.20	3.00	\$30,400	\$0		\$30,400
<b>Total</b>	<b>0.20</b>	<b>3.00</b>	<b>\$30,400</b>	<b>\$0</b>		<b>\$30,400</b>

## Explain any budget challenges or successes:

We anticipated using more personnel than what was billed. Because of this, we had an excess of funds under this budget category. There was undocumented leverage from MDHA for three positions that is not included in the total. In addition, the actual reimbursement in budget items was far less than proposed which led to match being less than proposed.

## All revenues received by the recipient that have been generated from activities on land with money from the OHF:

Total Revenue: \$0

Revenue Spent: \$0

Revenue Balance: \$0

- E. This is not applicable as there was no revenue generated.

**Target Lake/Stream/River Feet or Miles (original)**

### **Target Lake/Stream/River Feet or Miles (final)**

0

### **Explain the success/shortage of acre goals:**

The collaborative initially planned for acre totals to include larger prescribed burns that were unable to be completed. More work was done in the other outlined prescriptions which were a higher dollar per acre.
